

Playing the FFGS BINGO

Game rules

SETTING UP THE GAME:

- Print out various (different) FFGS BINGO cards.
- Print two copies of the caller's sheet. Cut one copy up, fold the squares (products' acronyms) in half, and put them in a bag.
- Each player receives at least one FFGS BINGO card.
- One person is nominated to be the caller (usually the trainer).

PLAYING THE GAME:

- The caller pulls a square from the bag and announces the product acronym. The second copy of the caller's sheet can be used to tick off the acronyms that were called, and then check if a player has a winning card during the game.
- Players check their cards for a match, and mark it.
- Players need to have marked 3 FFGS products' acronyms in a row (either vertically, horizontally or diagonally) to get a bingo.
- Players shouting out "bingo" will have their cards verified by the caller.
- To win the game, the player who got the bingo will need to give the definitions of all FFGS products marked on the card.
