

5.4 RECOMMENDATIONS OF THE EXPERT TEAM ON RESOURCE MOBILIZATION, PARTNERSHIPS AND DEVELOPMENT ASSISTANCE (CDP-ET-RMPDA)

5.4(1) Recommendations from CDP-ET-RMPDA for inclusion in the report of chair to EC-73

The current priority proposed outputs under the TORs of the CDP-ET-RMPDA which we believe will add value to the work of WMO around capacity development include:

- i) Assessment of development needs/gaps in each Region to feed into the revised Capacity Development Strategy (2022).
- ii) Review of current data collection platforms and methodologies, and providing recommendations on how best to manage/streamline.
- iii) Support of the independent evaluation of WMO projects (as requested by EC-72).
- iv) Input into guidance/recommendations on the facilitation of twinning arrangements and other innovative modes of bilateral cooperation, and best practise for taking forward.
- v) Review and document recommendations on best practise in terms of working with development partners/Government (to enhance knowledge sharing in this area).
- vi) As per request from Res 8.3/1(Cg-18), reviewing how initiatives including CSI, CREWS and VCP can complement/benefit each other.

It would be helpful to have feedback from EC if there are other outputs which should be considered/ prioritised by the ET-RMPDA, and may add value at this time.

5.4(2) Recommendations from CDP-ET-TDs for consideration by the Task Team on WMO Capacity Development Strategy

Whilst most of the outputs documented above should help feed into the revised CDS; in particular we would draw attention to output i) assessing needs/gaps - and recommendations around effectively meeting those gaps through the work of WMO and Members - as a central element of the CDS.
