

5.1 RECOMMENDATIONS OF THE EXPERT TEAM ON POLICY DEVELOPMENT AND INSTITUTIONAL MATTERS (CDP-ET-PDIM)

5.1(1) Recommendations from CDP-ET-PDIM for inclusion in the report of chair to EC-73

Numbers indicate project point/details

1. There is a need to collect and assess best practices from the most successful NMHS's in meeting global standards. The data should be mined from all available datasets as to minimize the need for surveys to the agencies. If such a survey is required, then each CPD-ET should collaborate on their information needs so there is a unified request for information.
5. Increase accessibility to documentation, possibly utilizing the Community Platform.
7. It is important to understand the difference between policy gaps and philosophical differences, as each will have a different solution. Policy gaps are easy to fix.

5.1(2) Recommendations from CDP-ET-PDIM for consideration by the Task Team on WMO Capacity Development Strategy

Numbers indicate project point/details

1. There is a need to collect and assess best practices from the most successful NMHS's in meeting global standards. The data should be mined from all available datasets as to minimize the need for surveys to the agencies. If such a survey is required, then each CPD-ET should collaborate on their information needs so there is a unified request for information.
5. (a) Improve RTC capability to communicate competence requirements.
(b) Develop effective data collection strategy to identify capacity gaps.
7. It is important to understand the difference between policy gaps and philosophical differences. The differences will have different solutions. Policy gaps are easy to fix
