Introduction to the OSCAR/Surface and this online course

Luisa Ickes

WMO OMM

World Meteorological Organization
Organisation météorologique mondiale

The aims of this training

- Learn how to find information in OSCAR/Surface and analyse your national network

- Analyse which information is missing/outdated in OSCAR/Surface

- Learn how to add and update information in OSCAR/Surface (GUI registration dialogue, GUI templates, webclient, GUI XML, API XML)

- Get help and support from us on your journey!

WMO OMM

How does this course work?

- We will work with the online platform **Moodle**

- Every day one topic session: you work through the input yourself and practice your knowledge in assignments

- **Assignments** will be checked and commented by us

- After each session we will one **interactive session (review)** in Teams where you can ask questions/discuss with us

WMO OMM

Content of each session in Moodle

- Introduction
- Video tutorials/video input
- Reading instructions (OSCAR/Surface manual)
- Assignments
- Quiz
- Extra: Discussion forum

WMO OMM

Schedule of the next days

- **Tuesday (06.07.):** Session 1 Using OSCAR/Surface to retrieve information; Network analysis

- **Wednesday (07.07.):** Session 2 Register stations using the OSCAR/Surface GUI and web client

- **Thursday (08.07.):** Session 3 Register stations (XML) using the OSCAR/Surface GUI and API

- **Friday (09.07.):** Wrap up

We encourage you to make the most out of it and take advantage that you can get help and support of us getting your stations into OSCAR!

WMO OMM

A guide through Moodle – online demonstration

WMO OMM

Walk through the first session: how to analyse your national observational network – online demonstration

WMO OMM

Support and further help

- Use **Moodle** to ask questions: A place to mingle = forum for questions around the assingments, sessions and other discussion

- You can also write messages via Moodle to Luisa

- In case of emergency: luisa.ickes@chalmer.se
