9.	 JTWC(io)0516.gif is a Joint Typhoon Warning Center (JTWC) product. It shows a map of the South China Sea and surrounding areas. A large yellow shaded area indicates the location of Typhoon Molave. A purple circle marks the eye of the typhoon. A black line with dots shows the projected path of the typhoon. The map includes latitude and longitude coordinates. A small red circular icon with a white symbol is located at the bottom right of the map area.	JTWC(io)0516.gif	Joint Typhoon Warning Center, US Navy	<a href="https://upload.wikimedia.org/wikipedia/commons/d/d8/JTWC_io0516.gif">https://upload.wikimedia.org/wikipedia/commons/d/d8/JTWC_io0516.gif</a>	public domain
10.	 A photograph showing a meteorologist in a white lab coat and a dark hijab working at a desk in a control room. She is looking at multiple computer monitors displaying various weather radar and satellite imagery. The room has several other monitors and equipment in the background.	Meteorologist at Indonesia Meteorological and Geophysical Agency, BMKG	WMO	<a href="https://flic.kr/p/EP4xxU">https://flic.kr/p/EP4xxU</a>	<a href="https://creativecommons.org/licenses/by-nc-nd/2.0/">https://creativecommons.org/licenses/by-nc-nd/2.0/</a>

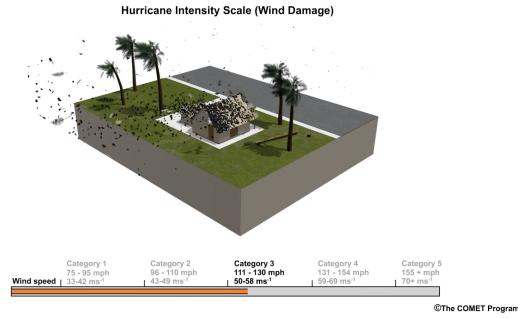

11.	 <p>The screenshot shows a map of New Zealand with a focus on the North Island. An orange warning polygon covers the Auckland region. A callout box provides details: Period: Shrs from 9am - 2pm Mon, 21 Mar; Area: Auckland including Great Barrier Island; Forecast: Expect a further 40 to 70 mm of rain to accumulate on top of what has already fallen, mainly south of the Harbour Bridge, though some localised areas may see larger accumulations. Peak rates of 15 to 25mm/h, but localised areas of torrential rain of 25 to 50mm/h are likely in thunderstorms; Impact: Heavy rain may cause streams and rivers to rise rapidly. Surface flooding and slips are also possible and driving conditions may be hazardous; Issued: 9:53am Mon 21 Mar.</p>	heavyrain-impact-mobile-NZMetSvc21Mar2022.png	NZ MetService	Warnings & Watches page, Meteorological Service of New Zealand, <a href="https://www.metservice.com/warnings/home">https://www.metservice.com/warnings/home</a>

[Tweet](#)

Across the North Island, most places are likely to see some rain from Sunday. Eastern areas have the highest probability, especially on Monday, with the upper South Island also getting a taste to close out the long weekend. Check out the outlook at [bit.ly/SWOutlook](https://bit.ly/SWOutlook)

**Example of spatial variation in thresholds from the Meteorological and Hydrological Service of Croatia**

Temperature thresholds for the heatwave hazard for eight towns in Croatia

Minimum temperature (°C)			Maximum temperature (°C)		
Osijek	20.1	21.2	22.9	35.2	36.7
Zagreb	20.2	21.3	22.9	33.7	35.1
Karlovac	20.0	21.1	22.7	34.5	35.9
Gospic	17.0	18.0	19.6	32.1	33.4
Rijeka	22.7	23.7	25.1	32.7	33.9
Knin	20.5	21.6	23.1	35.5	36.9
Split	25.8	26.8	28.2	33.9	35.1
Dubrovnik	25.4	26.3	27.6	32.3	33.2

Description of thresholds		
<span style="background-color: yellow; border: 1px solid black; padding: 2px;"></span>	Moderate heatwave hazard	
<span style="background-color: orange; border: 1px solid black; padding: 2px;"></span>	High heatwave hazard	
<span style="background-color: darkred; border: 1px solid black; padding: 2px;"></span>	Extreme high heatwave hazard

87.	 <p><b>IPAWS Architecture</b> Standards based alert message protocols, authenticated alert message senders, shared, trusted access &amp; distribution networks, alerts delivered to more public interface devices</p> <p>The diagram illustrates the IPAWS architecture. It starts with 'Alerting Authorities' (Local, State, Territorial, Tribal, Federal) which feed into the 'IPAWS OPEN Alert Aggregator/Gateway'. This gateway then connects to the 'Message Router' (Open Platform for Emergency Networks). The router interacts with various 'Alerting Disseminators' including the 'Emergency Alert System', 'Commercial Mobile Alert Service (CMAS)', 'Internet Services', 'NOAA', 'State / Local Unique Alerting Systems', and 'Future Technologies'. These disseminators then reach the 'American People' through various channels such as AM/FM Satellite Radio, Digital, Analog, Cable, and Satellite TV; Commercial Networks; Web browsers, Widgets, Web sites, Social media; NOAA Weather Radio; FM RDS; ETIN; Siren; and Digital Signage.</p>	IPAWS-US-CAP-diagram.png	FEMA	<a href="https://etrp.wmo.int/course/view.php?id=157">https://etrp.wmo.int/course/view.php?id=157</a>	Public domain
