

5. WMO Capacity Development Framework

9th Meeting of Capacity Development Panel

(EC-CDP-9)

22-23 April 2024

WORLD
METEOROLOGICAL
ORGANIZATION

First item on EC-CDP Terms of Reference

Promote the WCDF to relevant stakeholders in order to align their activities with the Framework, keep the WCDF under review, and propose updates and adjustments as necessary.

Resolution 36 (Cg-19) - *Requests the Capacity Development Panel to report to EC on the uptake and use of the WCDF.*

Decision 2 (EC-77) - *To keep the WMO Capacity Development Framework and related implementation actions under review in view of the rapidly changing capacity development landscape, and propose updates and adjustments as necessary.*

Content

1. Status of publication of WCDF
2. Promotion of WCDF
3. Development of Case Studies by EC-CDP

Status of publication of WCDF

- Ongoing **full editorial work**
- Received the first comprehensive review and questions from editor
- TT Chair and WCDF consultant will be contacted for some clarifications
- Following completion of full editorial work, **the WCDF will be translated** to the other 5 WMO Official languages

Promotion of WCDF

- A brief introduction to the WCDF was added to the webpage of the EC-CDP
- A link to access the WCDF is provided on the page

WMO Capacity Development Framework

Following Decision 12 (EC-72), the Capacity Development Panel was requested to review the WMO Capacity Development Strategy (WCDS). The revision of WCDS provided an opportunity to analyze the changing Capacity Development landscape, assess existing and future practices, and learn from others working in the same domain.

The revised document provides an overarching strategic framework for capacity development, therefore the new version was adopted by Congress-19 as a framework and it is entitled **WMO Capacity Development Framework (WCDF)**.

The WMO Capacity Development Framework is expected to be published in all 6 WMO official languages in 2024. Meanwhile, this important document can be consulted at the Cg-19/Doc. 4.4(1), ANNEX, APPROVED.

Increasing the promotion of the WCDF

Some ideas for discussion

- Creating an individual webpage dedicated to WMO Capacity Development, where the WCDF will be one of the elements of information provided
- Delivering an information webinar
- Working on a map of Capacity Development activities of WMO (2024-2027)

WMO Capacity Development Framework

Following Decision 12 (EC-72), the Capacity Development Panel was requested to review the WMO Capacity Development Strategy (WCDS). Development of Case Studies by EC-CDP

- The case studies developed in 2023 (RAs II, III, and VI) are available on the webpage of the EC-CDP
- Each case has an individual page containing an overview and access to full case study and presentation slides for more details
- A link to access the template for preparing case studies is provided on the page

Applying the WMO Capacity Development Framework

The Capacity Development Panel is collecting case studies demonstrating good practices when applying the WMO Capacity Development Framework. The initial set of cases is available below and the collection is intended to keep growing in order to include examples from all WMO Regional Associations.

Those wishing to contribute to this collection can prepare Cases using the [TEMPLATE](#) and email to tra@wmo.int for consideration of the Panel. Your contribution will be most welcome!

for southern South America**

A case study from RA-II

Continuing effort to collect case studies

Some ideas for discussion

- Restart the effort of EC-CDP to provide at least one case study for each RA
- Provide peer support to assist the preparation of case studies in RAs I, IV and V, if appropriate
- Consult with SERCOM, INFCOM, RB, and technical departments, on possible contributions to additional cases

Some initial ideas for discussion

Promoting the WCDF

- Creating an individual webpage dedicated to WMO Capacity Development, where the WCDF will be one of the elements of information provided
- Delivering an information webinar
- Working on a map of Capacity Development activities of WMO (2024-2027)
- Restart the effort of EC-CDP to provide at least one case study for each RA
- Provide peer support to assist the preparation of case studies in RAs I, IV and V, if appropriate
- Consult with SERCOM, INFCOM, RB, and technical departments, on possible contributions to additional cases

Thank you.
