

# Report from HCP focal point to CDP

## New Training courses developments

- Guidelines on Seasonal Hydrological Prediction (WMO No. 1274) and **HydroSOS methodologies** have been developed through a **three-phase training approach**:
  1. Self Learning phase (Autonomous course)
  2. online with a trainer
  3. Hands on training
- **Regional implementation is planned for Q4 2025 in RAIII**

NEW

**6 autonomous courses** developed in 2025:

1. "2025 edition: Basic Hydrological Sciences, Core Topics"
2. "2025 edition: Introduction to Rating Curves"
3. "2025 edition: Introduction to Groundwater Monitoring"
4. "2025 edition: Basic Hydrological Sciences, Snow and River Ice Focus"
5. "2025- Advanced Topics in Hydraulics, Hydrological Sciences"
6. "Hydrological Status and S2S Hydrological Prediction" (in Spanish)

- Training is supported through both Regular Budget and Extra-Budgetary Project activities
- Five online trainer-led courses and one face-to-face trainings are being conducted for WMO Members
- Training materials are continuously being developed in collaboration with ETR and infrastructure colleagues.
